### Career

#### Fidelity Investments

Work Intake – Innovated and implemented scalable processes to manage the high volume of security requests for client facing Fidelity applications

#### Atomic Tower

Big Data for the Rest of Us – CEO & Founder  
Conceived, designed and implemented this disruptive BI company  
Led to a finalist position in MassChallenge, raised funds & signed first deal

#### Sr. Management

VP of Engineering - Led all team building and development efforts

#### Project Management

Fidelity Investments | MFS | Iron Mountain Digital

Years of experience delivering technical products to market on-time, feature complete and within budget. Expertise in organizing complex projects in a matrix environment.  
Demonstrated ability to understand highly technical infrastructures, manage diverse teams, identify and drive towards goals while ensuring quality.

#### Engineering

Software engineering roles utilizing Windows technologies for both desktop and web based applications. Technologies and languages included: C++, COM, MFC, STL, ASP, VB.NET, SQL Server, T-SQL

#### Financial Services

Lots of fun at Fidelity Investments starting new endeavors, organizing back offices and learning about financial services. Started as a New Accounts Rep, helped start the Pooled Income Fund by setting up the back office, turned around operations on their Cincinnati desk at Capital Markets too. NASD Series 6, 7, and 63

#### Timeline
